DemandWorks Smoothie®

Sales and Operations Planning Software

Forecasting
World-class forecast accuracy combined with proprietary Pivot Forecasting® for real-time review and synchronization at any level of aggregation within product, channel or customer dimensions.

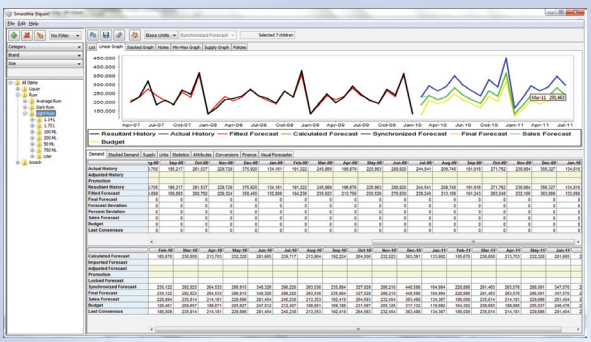
Demand Consensus
Incorporate input from sales and marketing, budgets, POS and other reference information in your planning. Collaborative users can provide their input using specialized Excel spreadsheets or with the powerful Smoothie Collaborator software. Any forecasts can be retained for performance monitoring.

Supply Policy Optimization
See the effects of changing lead times, reorder quantities and service levels on projected inventory investments.

Distribution Requirements Planning (DRP)
Manage exceptions and stock replenishments in complex, multi-tiered, demand-driven distribution channels.

Procurement and Manufacturing Planning
Integrate current inventory, in-transit and order information to generate and manage tactical procurement and master production plans. Includes support for N-Tier material relationships for formulations, kits and assemblies.

Progress Smoothly
DemandWorks offers a progressive range of solutions for forecasting, demand management and supply planning. You can purchase a Smoothie forecasting license for as little as $3,000 and upgrade easily to other editions for standalone or server-based demand management, stock optimization and N-Tier supply planning. A Learning Edition is also available for $500 including a web-based introductory training session.



Accurate forecasting and a lot more.
